MODEL 777 GEN 2

WHEN SAFETY IS A PRIORITY

Don't let workplace accidents become commonplace. Audible alarms lose their effectiveness over time as workers become used to them and are also less effective in loud environments where they may not be heard. Visual safety devices are more effective so we pioneered an innovative new safety device designed to increase visibility and prevent accidents.

Safety Lighting Package:

We redesigned our Model 777 GEN 2 Arc Warning Light to be more compact in size and defined in light projection. Our variety of color options create a reliable universal safety light that can be used in a variety of different applications. Don't trust an inferior light – it could cost you in the end.

J.W. Speaker offers a complete safety lighting package, designed to help both your operators as well as your workforce on the floor, adding highly visible safety precautions. Can be combined with linear safety light as per safety requirements.

Blue Arc Warning Light

Green Arc Warning Light

Red Arc Warning Light

Don't trust an inferior light – it could cost you in the end.

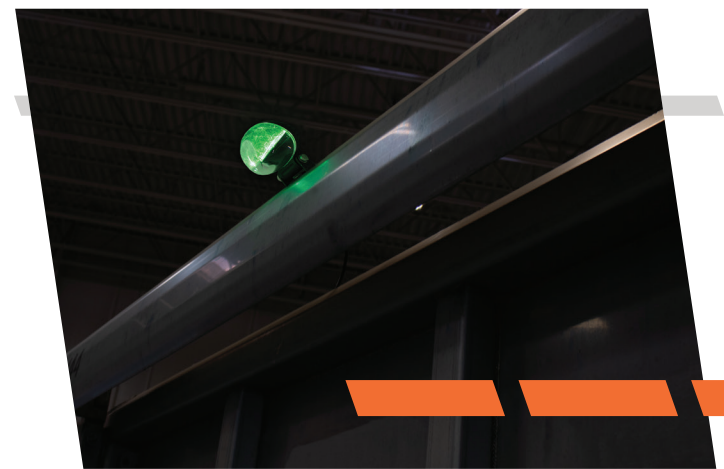

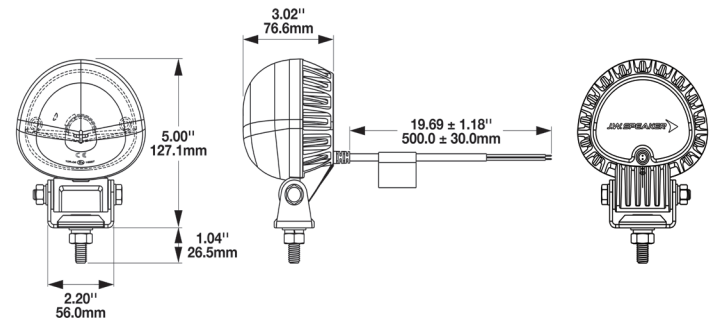

Model 777 Gen 2 is a reliable universal safety light that can be used in a variety of applications. It creates a safety "keepout" zone that is highly visible to keep employees and pedestrians away from moving vehicles.

Model 777 GEN 2 LED Warning Light
