

FLOSMART

REAL-TIME SAFEGUARDING FOR YOUR FLEET

FLOSMART FOR GRACO AUTOMATIC LUBRICATION SYSTEMS

FloSmart is an innovative IoT (Internet of Things) solution that provides real-time insights into your automatic greasing system.

Designed for earth moving fleets, it creates visibility where there currently is none, ensuring your equipment is protected, productive, and primed for peak performance. With FloSmart, we add a compact monitoring device to your equipment's grease pump. Installation is fast and efficient. The FloSmart Device, backed by a 1-year warranty, monitors system performance, so you'll instantly know when there is a fault.

SMART MONITORING. PROACTIVE ALERTS. SEAMLESS PERFORMANCE.

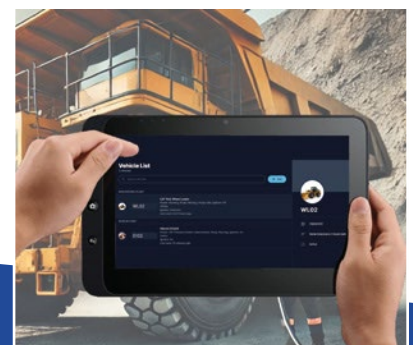

Hardware:

A compact, durable device seamlessly fitted to your pump.

Information Transfer:

Real-time fault monitoring of the lubrication system.

Data Insights:

Alerts and logs for on-the-spot visibility, captured with time stamps.

FLOSMART

Real-time monitoring that enables proactive action

FloSmart helps extend machine availability and increase equipment reliability with minimal effort, reducing the need for technician call-outs and improving overall machine utilisation. Email and WhatsApp notifications keep you informed and prepared.

INCREASE EQUIPMENT UPTIME WITH REAL-TIME ALERTS

FloSmart helps keep your equipment visible - every step of the way - by alerting you when:

Low grease level is detected in the reservoir

Internal system error is detected

The system monitors greasing events

1-year warranty

No structural changes

Simple installation setup

Key Benefits:

- ✓ **Reduce Downtime:** Immediate alerts prevent costly breakdowns by enabling quick, proactive responses.
- ✓ **Protect Assets:** Real-time notifications ensure your machines are protected against unexpected breakdowns.
- ✓ **Save on Costs:** Fewer call-outs and increased uptime mean more value and reliability for your operation.
- ✓ **Gain insight** into your fleet's grease system status with an overview of active and alarmed vehicles. Data enables you to plan scheduled maintenance with ease.
